PROJECTS

Portfolio

The aim of this project is to design and develop a personal portfolio website using HTML, CSS, and JavaScript. This portfolio serves as a digital representation of my skills, projects, and professional achievements. It features a responsive design, interactive elements, and a user-friendly interface to enhance user experience and accessibility.

Student Feedback System

Developed the front-end of a student feedback system using HTML, CSS, and JavaScript as a part of a five-member team. The aim of the Student Feedback System is to provide a digital platform for students to submit feedback on hostel facilities, food and faculty. It helps institutions analyze responses, improve teaching methods, and enhance the overall academic experience.
